

Superstore Sales & Profit — Data Visualization Story

Task 2: Data Visualization and Storytelling

\$2,326,534	\$292,297	5,111	12.6%
Total Sales	Total Profit	Total Orders	Profit Margin

Business Story & Key Takeaways

- **Sales scale:** The dataset contains 5,111 unique orders and \$2,326,534 in total sales.
- **Category performance:** Technology leads category sales at \$839,893 and category profit at \$146,543.
- **Regional performance:** West has the highest sales at \$739,814.
- **Profit risk:** Tables have negative total profit of \$-17,753; Bookcases and Supplies are also negative.
- **Trend:** Annual sales rise from \$494,040 in 2023 to \$745,568 in 2026 in this dataset.
- **Action area for analysis:** Investigate discount levels, pricing, and product-level profitability for negative-profit sub-categories before drawing operational conclusions.

Dashboard Design

Use KPI cards at the top, trend and comparison charts in the middle, and detailed product/sub-category analysis below. Add slicers for Order Date, Region, Category, and Segment. Avoid unnecessary chart types, excessive colors, and clutter.

Task 2 Submission Checklist

1. Create the dashboard in Power BI or Tableau.
2. Include KPI cards for Total Sales, Total Profit, and Total Orders.
3. Include category, region, monthly trend, sub-category profit, and top-product visuals.
4. Add concise business insights and context to explain what the visuals show.
5. Capture dashboard screenshots or export the visual report as PDF.
6. Create a NEW GitHub repository for Task 2.
7. Upload the dataset used, dashboard/report, visuals/screenshots, and README.md.
8. Submit the GitHub repository URL through the internship form.
